SEPT 25 - OCT 1
COOL CODING WEEK

Brought to you by:

- **Brown County Redevelopment Commission**
- **Eleven Fifty Academy**

Eleven Fifty Academy is a nonprofit coding academy that teaches all ages and skill sets how to code through hands-on, immersive experiences. For a full week in September, Eleven Fifty Academy staff and trained BCS employees will be delivering these educational experiences to students across the district at all grade levels.

As the workforce demand for computing skills continues to grow, Brown County Schools strives to close the growing technology gap and provide students opportunities to explore computer science. With the help of Eleven Fifty Academy, Cool Coding Week will serve as a launching point for continued computer science initiatives in Brown County Schools, as well as the Brown County community.
